Army, Center of Military History. This monograph takes that
evidence and applies it to tactical situations. The resultant
lack of responsiveness to administrative problems on the part
of the Commanding Officer, 44th Medical Brigade, an officer on
the same command level as the commanding officers of each
area support command, was inevitable, although difficult to
explain to the Commanding General, 1st Logistical Command.
TheGAOreportconcludedthat"thechancesthatgroundtroopswereexposedto
The length of hospitalization for Vietnam victims was half of
what it was for injured men in Korea--48 days for Vietnam
compared to 91 days for Korea. Because of the persistence of
Agent White in soil, it was not recommended for use on crops,
but was most often used in areas where longer persistence
rather than immediate defoliation was desired, such as inland
forests.

His present work constitutes a candidly expressed authentic overview of the
monographs in the series are based primarily on official
records, with additional material from published and
unpublished secondary works, from debriefing reports and

interviews with key participants, and from the personal experience of the author. These compounds have been used worldwide for the control of weeds and unwanted vegetation, although the application of 2,4,5-T is no longer permitted in the United States following a series of Environmental Protection Agency directives in the s.
