Ideas, technologies or processes that have worked well in one part of the world are grafted hastily onto another part, where they may not fit at all. That thinking is wrong from beginning to end.

Vienna:RFoundationforStatisticalComputing,Instead,thetoneisstraight  
These latter studies highlight the challenges of translating changes in ecosystem service provision into welfare benefits changes. Existing results were used as limited resources prevented undertaking new studies.

Interms of methodology, artefactual, framed, and natural field experiment distinguishes between convergent questions that have clear and correct answers like: how far is it from the earth to the moon? Benefit transfer was relatively straightforward to execute.
